Mar 2014 – Dec 2016

JOB EXPERIENCES

- Developed Laravel-based web applications and Vue.js frontends for e-commerce, enterprise, and internal systems.
- Created and maintained secure RESTful APIs for web and mobile integrations.
- Integrated 3rd-party APIs including payment gateways, analytics, and messaging services.
- Designed and implemented responsive, user-friendly UI for web and mobile platforms.
- Optimized MySQL/MSSQL databases for performance, scalability, and data integrity.
- Built mobile apps using Flutter with Laravel APIs as backend services.
- Deployed and managed applications via Google Cloud Platform.
- Reverse-engineered legacy systems for migration to modern PHP/Laravel frameworks.
- Developed POS applications and backend APIs for inventory and sales systems.

- Collaborated with developers and stakeholders to deliver secure, scalable solutions.
 - Maintained and enhanced CMS-based websites (WordPress, Joomla, OpenCart).
-
